Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Hogrefe et al. (Pat. No. 4,561,443).

Regarding claim 1, Hogrefe et al. show a module 20, 18 for use with a clinical instrument 14 having a user interface to provide at least a subset of programmer functionality for an implantable medical device 16, comprising a telemetry circuit 20 for telemetric communication with an implantable medical device to interrogate the implantable medical device in retrieval of data; a connector (that structure associated with the telephone line and phone headsets, etc.) adapted to be electrically coupled to the clinical instrument; and means for coordinating real-time communication (modem 18) between the telemetry circuit and the clinical instrument user interface to cooperatively uplink data from the implantable medical device upon receipt of an interrogation command entered on the clinical instrument user interface.

Regarding claim 2, the connector of Hogrefe et al. (i.e., the telephone line) at least *allows* an electrical power source to be connected to power the telemetry unit. The claim as written does not require that a power source be connected in the manner recited –merely that the connector can be used in such an operation if one so desires.

It is well-known that telephone lines can transmit power. The telephone line therefore is considered to allow or enable such connection.

Regarding claim 5, since the applicant is not claiming the clinical instrument but merely a module adapted for use with a clinical instrument, whether or not the module is adapted for use with a bedside monitor or an external defibrillator may entirely depend upon the construction of the clinical instrument—a non-element of the invention.

Response to Arguments

Applicant's arguments with respect to claims 1-3, 5 and 8 have been considered but are moot in view of the new ground(s) of rejection.

The declaration referenced in the Remarks is acceptable.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3766

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
